

# VETERINARY ACADEMY OF HIGHER LEARNING

**SCHLOSS-SEMINAR**  
CONTINUING EDUCATION FOR VETERINARIANS

CERTIFIED CANINE REHABILITATION PRACTITIONER

Thank you for your interest in the CCRP education.

This education is the only global, university based, RACE approved specialization in the world. The duration of the full education depends to some extent on the student as it is a combination of e-learning, presence days, externship, case documentation and the final exams.

The CCRP consists of 5 steps:

- 1) E-learning (prior to the presence days)
- 2) Presence days: labs and interactive case discussion
- 3) 40 hours externship: can be started as soon as E-learning and presence days have been completed
- 4) 5 case documentations: can be started as soon as E-learning and presence days have been completed
- 5) Exams: all previous parts need to be completed and the 5 cases need to arrive minimum 8 weeks prior to the date you select. Evaluation of the cases will result in either "passed" = allowance to take the exams, or failed: new cases need to be submitted

In order to allow the student most flexibility particular to accommodate normal working hours, you can start the e-learning any time in the year. This part contains all lectures and thus scientific background necessary to become a CCRP. It has to be finished before you come for the presence days. To secure the knowledge level necessary for the presence days, quizzes are included after each section, which need to be passed with a minimum of 80%. The presence days are focusing on hands on experience in small groups as well as interactive case discussions.

After completing these 2 parts of your education you are allowed to start your externship and your case documentations. You need to document 5 cases: 2 Orthopedic, 2 neurologic and one of your choice, which can also be a different species.

Details about the case documentation can be downloaded on the website -[www.u-tenn.com/exam](http://www.u-tenn.com/exam)

As you have fulfilled all these pre-requisites, you can register for the exams. The exams are 3-fold: written, oral and practical. A minimum of 70% needs to be reached in each section.

For this complex education, most people need a minimum of 1 year. We highly recommend to come for exams no later than after 2-3 years.

The title CCRP is recognized all over the world. We frequently help to relocate experts and also many clinics nowadays request this title for such a position.

Price and other details can be found on the attached flyer. We offer installment plans and if you need any further support, we always try to help.

It would be a pleasure to meeting you.

Best regards

Beate
